

# Your special force with excellent cloud connections

5059i • 6059i • 7059i

The 5059i, 6059i and 7059i A3 multifunctional systems are true superheroes when it comes to black and white printing – at speeds of 50, 60 and up to 70 A4 pages per minute! Their flexibility and ability to professionally manage large print jobs will help you transform your office into a productive world of wonders. Thanks to seamless integration into all common cloud-based applications, the systems are your perfect partners for future-oriented office work – for scanning, printing, copying or faxing. And best of all, the first-class print quality and user-friendly operation take your workflows to a new level that would make even the greatest office heroes jealous!

## HIGHLIGHTS:

**OPEN:** Would you like seamless access to your documents at all times – from your office or home office? That's no problem at all: The ability to integrate popular cloud platforms – such as Google Drive, Microsoft SharePoint or OneDrive – means that the systems are well equipped for the future. Document Guard can prevent confidential documents from being scanned or copied – wherever required.

**PRODUCTIVE:** The DP-7170\* high-speed dual scanner with a scanning speed of up to 274 image pages per minute at 300 dpi and integrated ultrasonic sensor for multi-feed detection increases your productivity enormously when digitising your documents. At the same time, the additional integrated staple detection\* protects your originals from damage. Apart from scanning, the processing of different paper weights (52-300 g/m<sup>2</sup>) and formats from DIN A6R to SRA3 is not an obstacle for these systems either. On the hardware side, various finishers with a stapling function\*, brochure or Z-fold module\* and an infeed unit\* are available to extend the finishing process.

**ENERGY EFFICIENT:** The energy consumption of the multifunctional systems can be displayed and monitored transparently on the 10.1 inch touchscreen, allowing you to optimise how you use the systems. In addition to providing energy-efficient toners, we have also increased the proportion of recyclable plastic in our MFPs to reduce the consumption of resources in the circular economy. EcoPrint, duplex printing and automatic skipping of blank pages support this objective.

**SECURE:** Multiple overwriting and deletion of scan, print and copy data is a standard feature of these systems. The 'Secure Boot' function ensures that only authorised firmware is executed during each start-up, while the 'Run Time Integrity Check' regularly verifies its validity. This means your data is protected at all times and safe from malware. Data transfers on the Internet are secured by encryption protocols such as TLS 1.3.
