# Why complicate something when it can be so simple?

Your applications don't necessarily need output in colour, but do they need a significantly higher printing volume? If you mainly process delivery notes, invoices or labels, then you can benefit from this high-performance A3 b/w system. Thanks to its short warm-up time and high print speed of 60 A4 pages per minute, you can not only expect significantly higher productivity, but also your print jobs can be processed with extraordinary speed. The print resolution of 1,200 x 1,200 dpi ensures that prints are outstanding in quality and crystal-clear in legibility so that they are easy to read.

### What you can expect:

**High performance:** The P-6040DN's high print resolution, fast print rate of 60 A4 pages per minute, 9 inch touch panel for simple operation, USB port, 320 GB hard disk, 4,000 sheets optional finisher, maximum paper capacity of 7,150 sheets and capability to process paper in sizes up to SRA3 format mean its more than capable for even large complex jobs.

**Robust:** The system has a long service life and easily processes a wide range of different print media and paper thicknesses. It has fewer moving parts as it only prints in monochrome. This makes it a sturdy and stable workhorse you can always rely on.

**Consistent:** Thanks to its high print resolution and optimised toner, the system reliably delivers a consistently high print quality. Its vast paper capacity guarantees uninterrupted production runs. Its easy-to-use, large touch panel keeps things simple and allows you to keep your cool under pressure, thanks to its intuitive operation.

**Expandable:** The new system can also be adapted to even the most specific requirements and individual demands. It offers a wide range of output options, such as a job separator, an output tray and brochure module and, of course, various finishers that make time-consuming work a thing of the past. The impressive stapler, which can process up to 65 pages in one go.
