

# Show your true colours with a superior b/w system.

Sometimes, less is more. However, with the innovative 5058i/6058i/7058i A3 b/w multifunctional systems, this only applies to output of black and white toner, as these MFPs offer a great deal more! An output speed of up to 70 A4 pages per minute, scanning capacity up to 320 sheets, various finisher options, brilliant print quality and extensive security features, also thanks to the optimisation of the toner and long component lives, it has a greatly reduced impact on the environment. We could go on raving forever, or you can simply let the performance of these powerhouses speak for themselves.

## HIGHLIGHTS:

**Time-saving:** Capture individual documents, receipts or sales slips for travel expenses and report them quickly and easily with the integrated MultiCrop receipt scanning function. In just one step, it can digitally cut, straighten, and scan up to 16 receipts simultaneously and then store them separately as a file. A great relief, especially for small-format and non-standardised originals! For professional high-speed digitalisation, we recommend our Dual Scanner with ultrasonic sensors\*, which can process up to 274 image pages per minute (300 dpi). The scanning unit not only detects and stops the scanning process when multiple originals are fed in, but also protects them at the same time thanks to its innovative staple detection.

**Multi-layered:** The systems not only process a wide range of paper weights (52-300 g/m<sup>2</sup>) and formats (A6R-SRA3), but also offer extensive finishing options. The Job Separator provides a better overview thanks to the internal offset output\*, where print jobs or other outputs are sorted to either offset to the left or right, making for easy removal. Various finishers with a stapling function\* are available for professional paper management creating less manual work, and in combination with the brochure and/or Z-fold module, your business letters can be folded to fit the length envelope.

**Climate-friendly:** The climate concept is at the forefront of the multifunctional systems, with energy efficiencies and emissions optimised beyond current environmental requirements for the three systems. Functions such as EcoPrint, duplex printing and the automatic skipping of blank pages also further promotes this way of thinking, as resources such as paper, toner and time are saved in everyday workflows.

**Play it safe:** A standard feature of the system is that it can overwrite and delete print, scan, and copy data multiple times, as well as current encryption protocols such as TLS 1.3 allowing for secure data transmission on the Internet. The USB card readers\* provide additional security by automatically verifying your identity on the multifunctional system using a contactless card or transponder.
