These handy multifunctional systems offer numerous features that make it easier to perform your everyday office tasks. Documents can be protected with the integrated security technology, while environmental friendliness is guaranteed by the low energy consumption and resource-saving manufacturing of the systems. In addition to high print quality, reliability, and ease of operation, the systems offer wireless connectivity, making them user-friendly and flexible to use. The perfect solution for modern offices that prioritise efficiency, safety, and environmental friendliness.

HIGHLIGHTS:

CAPTURE OPERATIONS MADE EASY: You can concentrate on more important things while the MFP processes your documents reliably and quickly, thanks to a wide range of scanning features such as Multi Crop and ID Card Copy. The devices can scan up to 80 pages per minute, enabling you to power through and quickly digitalise even large stacks of paper. The dual scanner included as standard enables gentle scanning of double-sided documents in a single pass, so your originals remain intact.

PERFECTION OF PROTECTION: Our multifunctional systems are equipped with various security protocols and technologies, including the Trusted Platform Module (TPM)*, Transport Layer Security 1.3 (TLS 1.3), and Allowlisting, to reliably protect your data. The option of connecting a card reader allows contactless authentication and offers additional protection from the very first time you use the panel.

ENVIRONMENTALLY FRIENDLY: The heating elements use less energy to complete the printing process, thanks to the reduced melting temperature of the toner. This reduces energy consumption and saves costs. During production, special attention was given to using recycled plastic both on the inside and outside of the product in order to provide greater sustainability.

REVAMPED APPEARANCE: Modern, compact and user-friendly: this is how our innovative multifunctional systems present themselves, emphasised by the black document feeder and the display's new user interface. Print jobs can be managed and sent off even more efficiently thanks to a wide range of selection options and a numeric keypad (P-4021 MFP and P-4026w MFP) or a touchscreen display in bright colours with clear icons (P-4027iw MFP).
