

P-C3562i MFP / P-C3566i MFP

Multifunctionality that's tailor-made.

Who hasn't wished for an A4 colour multifunctional system that's as unique and versatile as your office's ever-changing requirements? The P-C3562i MFP and P-C3566i MFP fulfill these wishes as they can be expanded flexibly and comprehensively with various options and software solutions, are WLAN* and Wi-Fi compatible and support mobile printing and scanning. In doing so, they offer brilliant printing quality, thanks to a maximum resolution of 1,200 x 1,200 dpi.

What you can expect:

Compact, but versatile: The P-C3562i MFP and P-C3566i MFP offer high functionality thanks in part to the integrated HyPAS™ interface for practical apps and software solutions, as well as the Super G3 fax system (P-C3566i MFP only). Furthermore, they can be expanded in many ways – whether it's with a Card Authentication Kit, a manual stapler for 20 sheets or a paper capacity of up to 1,850 sheets. They're just as flexible in media processing – from prescription forms, to A4 letterhead, to other high-quality media with a weight of up to 220 g/m².

Captivating adaptability: Thanks to the large touch display, you can intuitively operate and manage the many functions of the P-C3562i MFP and P-C3566i MFP. You can also print or scan on your tablet or smartphone with both systems via the free Mobile Print App, Google Cloud Print or Wi-Fi.*

Rapid scanning, rapid search: The P-C3562i MFP and P-C3566i MFP are equipped with a dual-scan original feeder. That means they can read double-sided documents at max. 62 b/w or 46 image pages per minute. The continuous scan function allows more than 100 original documents to be copied in a single operation. You can also create text-searchable files simply and easily using the Scan Extension Kit*, and then edit them in MS Word, Excel or PowerPoint.

Secure for sure: There are many options for effectively protecting your confidential data against unauthorised access with the P-C3562i MFP and P-C3566i MFP: From the 'private print' function, to authentication with a card reader* and chipcard/transponder,* to installing a Data Security Kit.* The last of these guarantees that data which is saved on your hard drive* is deleted and overwritten in accordance with international security standards – and that's one more thing you can rely on.
