# Only true quality is real quality.

Today, colour multifunctional systems have to do more than simply supply excellent quality prints. The fact is, you need more than stand-out print quality to meet the needs of today's fast-paced work environment. That's why we developed the 7307ci and 8307ci high-volume A3 colour MFPs, which not only print at speeds of 73 and 83 A4 pages per minute in b/w and 65 and 70 in colour, respectively, but are also built with robust, long-lasting components. That both saves time when completing long printing jobs and helps to protect the environment.

### What you can expect:

**Sheer reliability:** in order to make office workflows more efficient, the new systems feature a dual scanner as standard, which includes an ultrasonic sensor that prevents multiple originals from being fed in at the same time during scanning. Up to 270 originals can be scanned and digitised in one run at a rate of up to 220 images per minute in colour and b/w at 300 dpi.

**Production line levels of efficiency:** these systems offer the ideal set-up for carrying out large print jobs. The optimised output speed is merely the beginning of the value-added chain. The systems can process a paper weights up to 300 g/m<sup>2</sup> from a maximum of eight different paper feeds in one printing process, maintaining a total paper capacity of 7,650 sheets. All this combined with the 4,000 sheet finisher\* – not to mention the brochure modules\* – gives rise to a professional, folded end product.

**Integrated security:** you can count on these systems when it comes to keeping your confidential data secure. Data to be copied, scanned and printed is protected by means of hard drive encryption. The Trusted Platform Module (TPM) offers additional support to this end. This security chip is integrated within the system. It saves and manages encryption codes generated on the device in the TPM's memory. Accessing the memory via external devices is – of course – impossible.

**Operation is a breeze:** the large 10.1 inch touch-sensitive colour display doesn't just look stylish – it will win you over with its intuitive operation and clear menu navigation. Additionally, the integrated HyPAS™ interface enables you to use a range of different HyPAS™ applications, as well as to incorporate customer-specific software solutions that will make your working day more sustainable and efficient now and in the long term.
